---

## Summary

Web Developer with over 5 years of expertise in Angular and web development within an agile environment. 10+ years of experience in CSS, HTML, and JavaScript, specializing in crafting engaging layouts and styles for web applications. To stay current with industry trends I successfully learnt and applied the MERN stack during a web development course in 2023.

My approach to development is rooted in collaboration, teamwork, and communication. I like combining my technical skills with a user-centric mindset to create visually appealing web applications.

## Skills

UI:      Angular, React, JavaScript, CSS/HTML, Sass, Node, MongoDB, MySQL, GraphQL, Express
Tools:  Github, VS Code, Version One, Jira, Agile, SAFe, Figma, npm

## Experience

---

Senior Software Engineer, GUI at Infoblox Inc, Santa Clara CA                    December 2008 – November 2023

### Cloud-based SaaS for network automation solution                    2018-2023
- Developed in a framework using Angular, Sass, Bootstrap and custom CSS.
- Scoped requirements, designed and implemented UI features.
- Collaborated with PMs and UX for workflows and wireframes.
- Used SAFe methodology for development.
- Worked on data visualization using D3.
- Worked with angular version 2, 7 and 12.
- Worked on improving accessibility of the UI.

### NIOS – web user interface for network automation solution                    2008-2017
- Responsible for the look and feel of the UI using HTML and CSS, JS.
- Worked on technologies involving Wicket, Ext JS.
- Designed wireframes from requirements and developed common markup templates.
- Worked on several iterations and revamps of the UI.

---

Student, Full stack Web development bootcamp, UC Berkeley                    September 2023 – December 2023

### ReadIt – full stack microblogging site built from scratch
- Group project built using the MERN stack.
- Used MongoDB, Express, React, GraphQL, and npm.
- Developed interactive and seamless user interfaces with React
- Created mockups using Figma.

## Education
**Bachelor of Engineering in Information Technology** from Mumbai university.
**User Experience Design** course from General assembly in 2020.
**Full Stack Web development bootcamp Certificate** from UC Berkeley  in 2023
