Summary

Front-end Web Developer with over 5 years of expertise in Angular and web development within an agile environment. 10+ years of experience in CSS, HTML, and JavaScript, specializing in creating engaging layouts and styles for web applications.

My approach to development is rooted in collaboration, teamwork, and communication. I like combining my technical skills with a user-centric mindset to create meaningful web applications.

Skills

UI: Angular, JavaScript, CSS/HTML, SCSS, Node, React, MongoDB, MySQL, GraphQL, Express, Jest
Tools: Github, VS Code, Version One, Jira, Agile, SAFe, Figma, npm

Experience

Senior Software Engineer (Front-End), Infoblox Inc, Santa Clara CA   2018 – 2023

Cloud-based SaaS for network automation solution
- Scoped requirements, designed and implemented UI features using Agile and SAFe methodologies.
- Developed in a framework using Angular, Bootstrap and SCSS.
- Collaborated with PMs, User Experience and back-end developers.
- Created Dashboard and Reports for data visualization using D3.
- Performed code reviews, wrote unit tests and fixed bugs.
- Improved accessibility of the UI.
- Worked with angular version 2, 7 and 12.

Software Engineer, Infoblox Inc, Santa Clara CA   2008 – 2017

NIOS – web user interface for network automation solution
- Implemented and maintained the look and feel of the UI using HTML, CSS and JavaScript.
- Created markup templates from wireframes.
- Worked on technologies involving Wicket, Ext JS.
- Worked on several iterations and revamps of the UI.
- Resolved browser and layout issues.

Student, Full stack Web development bootcamp, UC Berkeley   September 2023 – December 2023

ReadIt – full stack microblogging site built from scratch
- Group project built using the MERN stack.
- Used MongoDB, Express, React, GraphQL, and Node.
- Developed interactive and seamless user interfaces with React
- Created mockups using Figma.

Education
Bachelor of Engineering in Information Technology from Mumbai university.
User Experience Design course from General assembly in 2020.
Full Stack Web development [MERN stack] **bootcamp Certificate** from UC Berkeley in 2023.
